Your privacy is important to us. We at GlobalWare Technologies respect your right to privacy and will protect it. We will never provide or sell your personal information outside of GlobalWare Technologies and we will never release your personal data to any third parties. We will only use your information to administer our services and for any other purpose stated in this Privacy Policy. Basic functions Text to Voice Studio is an application designed to convert text files to voice. A text file is either a plain text file or a text file which contains any number of media files

---

like.mp3,.wav,.ogg,.mid,.wav. NOTE: We use.mp3 files by default, so if you have any other file types (e.g.,.ogg) you can set it in the batch conversion settings. The user only needs to enter the text of the file he wishes to convert into voice, and then he can select a different language according to his preference. The converted files can be played through any media player, so you can hear the file you have chosen, and you can listen to the entire file at once. The user can set the settings to convert only selected text, a range of selected text, or the whole file. All the files that we create can be named as you like: for example, user1\_andrewsmith.mp3 is the

---

result of converting the text file "Hello world! I am Andrew Smith." to voice. By using Text to Voice Studio, we can convert any text to voice, regardless of the OS you use. Specifications "This is a cool application, I found myself into a problem, in the contrary, I thought you are the best solution, I want you to stay with my company. Lim Chee Fong GlobalWare Technologies, Inc. All the files that we create can be named as you like: for example, user1\_andrewsmith.mp3 is the result of converting the text file "Hello world! I am Andrew Smith." to voice. And you can add your own personal touch to the files by adding your own playlist or

---

picture to them. You can also export the selected text into a Microsoft Word document, and add a subject line, a message or a note to any of the exported text. Further Features Text to Voice Studio has many more other useful features, which include: - Ability to convert multiple text files at once

What's New in the Text To Voice Studio?

The full version supports to convert Multiple Files. Text to Voice Studio is a handy and reliable utility designed to convert text files to speech with minimum effort from the user. Text to Voice Studio Description: Text to Voice Studio is a handy and reliable utility

---

designed to convert text files to speech with minimum effort from the user. Text to Voice Studio provides easy solution to transcode Word, RTF, HTML, EML and HTML files to speech.
