What's New in the Arabic Writer?

Arabic Writer is a light application designed to let you quickly convert Arabic text into Unicode. You can use it with the help of an Arabic language pack, which you can download from However, there's no need to install any language package, as no language packs or registry entries need to be installed and added to the Windows Registry. Arabic Writer is a free and portable application, so you can drop it anywhere on your hard drive, run it instantly and then read and write in Arabic with no delay. Install Arabic Writer in less than a minute, and you can enjoy its superb features. Arabic Writer User Interface: The Arabic Writer application is designed to let you manage Arabic characters either manually or automatically in Unicode mode. Let's say you have just opened a document in Hebrew mode. It is simply not possible to edit it in Arabic mode as all the inserted Hebrew characters are simply displayed as Arabic letters. When you install Arabic Writer, you can switch it into Unicode mode and all the input and output options will work in Arabic. On the left side, you will see a menu with a few items. Arabic Writer has a Convert button under which you can select the language in which Arabic Writer should work. Secondly, the menu displays a menu listing all the files that can be opened as an input file. Clicking on Open button will open a dialog that lets you select a file from your hard drive. In addition, you can pick one from the Windows Explorer as well. The next option on the left side of the window is the Convert to Unicode button. This button has two choices. Either you can convert an Arabic text to Unicode or you can convert an Arabic text into Unicode. Arabic Writer allows you to import and export Unicode files from other applications. You can read text from Windows' Chinese, Japanese, Korean, and even Arabic documents in Unicode. Likewise, you can write text to any Unicode format. Arabic Writer supports the following Unicode formats: UTF-8, UTF-16, UTF-16BE and UTF-16LE. Each format has its own separate translation option. The final drop down menu on the left side contains the options that let you change the input or output direction, insert Arabic numbers, apply the horizontal alignment (left to right, right to left and both), as well as bring

up the virtual keyboard. Arabic Writer also has a Help menu on the right side of the window. It lists detailed
