Description. Calendar Professional is a personal schedule planner. It helps you create and schedule your work tasks. Download.Q: How to close the tab using knockout.js? Using knockout.js I have following html In a function, I am opening a tab I am trying to remove the html $('.fa-plus').on('click', function () { $(this).parent().remove(); }); But it is not working. Is there any other way to remove the tab? A: The problem is that you're not removing the element, but rather $(this) here: $('.fa-plus').on('click', function () { //$(this).parent().remove(); //this line will remove the fa-plus itself, not the parent! $(this).parent().remove(); }); So, to fix that, remove the.parent() $('.fa-plus').on('click', function () { $(this).parent().remove(); }); See fiddle: “We felt [the lodging service was] too much of a hassle,” he said. “You have to pay money to go away and come back. [It was] to much of a hassle and not as fast as we wanted it to be.” The process, which has its origins in the way hotels once handled those time-sensitive reservations, has a certain science to it, but it’s often hit-or-miss for travelers who require wake-up calls at 5 a.m., clocks set at certain times to help them sleep and restaurants that
