### What's New In?

Q: Can I import data from a PHP file to a MySQL table? I want to import a table in a MySQL table. I know that this is possible if the table exists in the same database and is in the same format (using the mysql\_import) but I am just wondering if there is a way to achieve the same result with a different format so that i can import data from a file with php. So like if I can create a table in the same database with php and then use it as the mysql\_import file. Can anyone give me some help with this please? I have searched and have found nothing. A: You can just open a file and read the data. You can add data. In the end you can use the mysql\_close(). You can do it with PHP. But it would be best to use a phpsql extension. Capsule-Recovery System for the Operative Treatment of Pediatric Shoulder Instability and Subluxation. This case study describes the application of a novel system for internal fixation of pediatric glenoid labral injuries to stabilize prereduction shoulder dislocations and subluxations in 10 children with clinical instability and symptomatic shoulders. Unique features of this system include its ability to provide secondary stabilization after an initial procedure. This preclinical case series describes the 2- and 3-year outcomes after using the device for this purpose.Q: Pointer arithmetic and size of an array In a previous question I asked about how to figure out the size of an array by a given pointer to an element in the array. The provided answer worked for me, but the provided solution relied heavily on pointer arithmetic, not knowing the size of the array. I would like to see an example where the size of the array is not known. A: You could do something like this: int arr[10]; int \*p = arr; //... int a; do { a = \*(++p); } while(--p!= p); A: Maybe this will help: char \*p; p = &arr[0]; while(p
