About This is for the annual trade-mark and copyright infringement-free PC game. The User Interface (UI) is completely configurable, at times allowing you to modify the menus and even alter how the game plays. Gameplay The game is based on a single-player mode, however, the game is totally playable in co-op, either with a second player or AI. The game starts with a pair of the player's choice, from which each player can select the guns that they want to carry. Four guns are available to each player when they start the game. Then one per player. There are three different starting places and four unique levels to travel through. The game is also loaded with guns, there are guns for each of the player's different races. When the player reaches the level, he or she has a chance of getting a Blue Plasma weapon, if they haven't already gotten one from one of the companion characters. If the player does get a Blue Plasma weapon at level 4, then they will have one of three different options that they can select from each time that they start a new playthrough. One of the unique features of this game is that a mistake can lead to a bad ending. For instance, if the player is attacking someone who is carrying an Uzi or a Heavy Machine Gun, and he or she misses, it will lead to the player using the thermal scope on their weapon, giving away their position to the enemy, and causing the game to end. In other situations, the player can make a wrong move, causing the game to end. For instance, if the player of the AI is attacking someone that is carrying a Sniper Rifle, and he or she misses, that will lead to the AI player shooting the player's PC, ending the game. There is the player's health bar, a radar to help the player stay out of trouble and a slider of sorts. The slider is used to see how much damage the player has taken from the enemy. Unlockable Characters The game gives you four weapons to begin with. There are eight unlockable characters that players can play as. In addition to the four unlockable characters, players can get weapons that they did not start with. The game's interface is configurable. Possible Mods There are a number of things that can be done to this game if the person who created it were to decide to do so. In order to modify this game, the author must add the mod's own executable into the game, not just the mod itself. There are three different weapons that the player can unlock. There are two in each race.
