
Symantec Backup Exec 2015 14.2.1180 FP1 Multilingual 64 Bit ((BETTER))

Backup Exec 2012 Small Business Edition is optimized for virtual machines on O/Ss such as Hyper-V and ESXi providing a faster and more secure backup and restore experience. In VMware virtualization technology, backup data is protected on virtual machines. Disk data on the virtual machines has to be backed up to disk or the virtual machines have to be booted into the virtual machine environment and then recovery is performed. Migration Tools Symantec Backup Exec 2012 can use Backup Services for File and Disk (BSAWDFD) to protect your data and then migrate it from one physical server to another or to any type of network-attached storage device. The Essential Virtual Server feature of Backup Exec 2012 (formerly known as Advanced Server) allows data backup and recovery of Microsoft Windows Server 2008 R2, 2012, and 2016 editions, VMware ESX, ESXi and Microsoft Windows Hyper-V and Citrix XenServer and XenApp servers. The Essential Virtual Server client agents are included for data protection of Windows, and an optional and available agent can capture OVF templates for VMware and XenServer for deployment of VMware ESX or VMware ESXi hypervisors and Citrix XenApp applications. See the Symantec Backup Exec website for the free version of the product called Backup Exec Express Data Protection that is available for free. Backup Exec Express Data Protection is available for Microsoft Exchange and SQL databases, Symantec Recovery Manager, and Norton Ghost. A new software defined storage appliance for data protection is also available, which requires no configuration on client computers, no additional software, and can be installed and removed without rebooting the client. Symantec data storage appliances are available for Microsoft Exchange and SQL databases, Symantec Recovery Manager, and Norton Ghost.

Symantec Backup Exec 2015 14.2.1180 FP1 Multilingual 64 Bit

Symantec Backup Exec Small Business Edition is designed to deliver all the protection and business continuity tools you need to protect your business and its critical data with a single, easy to use product. With the release of Symantec Backup Exec 12, Symantec has completely rebuilt its range of products to offer more comprehensive and reliable backup and recovery for any IT environment. The new, modern range of Backup Exec solutions are designed to adapt for any business. Organizations can easily protect increasing amounts of data, in either virtual or physical, environments with integrated VMware and Hyper-V protection, while reducing storage and management costs through integrated deduplication and archiving technology; reduce customer business downtime through integrated bare metal and dissimilar hardware recovery features and backup to virtual (B2V) and convert to virtual (P2V) capabilities, and ensure critical information on virtual or physical systems is always protected and can be restored in seconds. To help businesses prepare for and overcome the problem of server failure and downtime, Symantec has introduced Backup Exec 2012 with integrated bare metal recovery and dissimilar hardware recovery also known as hardware discovery - capabilities. These new features make full server recovery easy, and offer it as a built-in element of Backup Exec 2012 data and application protection practices. For the busy business, Symantec Backup Exec Small Business Edition replaces confusion with confidence, offering complete data protection set-up in less than 10 minutes through three simple steps. In one simple yet comprehensive package proven in millions of installations worldwide, you get a total solution for data backup, system restoration and disaster recovery. 5ec8ef588b
