'visit Nosteam Forum Html' [CRACKED]

Visit Nosteam-Forum seems to be a scam. I downloaded vista because of this. I was thinking of purchasing a laptop which had windows 7 on it that was fully updated for school however after reading some of your comments I'm wary of it and would prefer a laptop that does not have a rather infamous virus on it (DDEBUS DRIVER). Plus my friends are telling me that it has been advertised on television as being a virus and when I look at my friends laptop it says DdeBus Driver virus (malware too). Anyways I wanted to ask if you could help me choose between the two options. I downloaded dr.dat from the internet because my bro told me to and it has a virus on it. I tried to start Dr. Dat, but it didn't run. How do I extract the dr.dat file or something so I can make sure it isn't a virus?
